CASTORIA

for Infants and Children.

MOTHERS, Do You KNOW that Paregoric, Lateman's Drops, Godfrey's Cordial, many so-called Soothing Syrups, and most remedies for children are composed of opium or morphine?

Do You Know that opium and morphine are stupefying narcotic poisons?

Do You Know that in most countries druggists are not permitted to sell narcotics

Do You Know that you should not permit any medicine to be given your child unless you or your physician know of what it is composed?

Do You Errow that Castoria is a purely vegetable preparation, and that a list of its ingredients is published with every bottle?

Do You Know that Castoria is the prescription of the famous Dr. Samuel Pitcher. That it has been in use for nearly thirty years, and that more Castoria is now sold than of all other remedies for children combined?

Do You Know that the Patent Office Department of the United States, and of other countries, have issued exclusive right to Dr. Pitcher and his assigns to use the word "Castoria" and its formula, and that to imitate them is a state prison offense?

Do Won, Know that one of the reasons for granting this government protection was because Castoria had been proven to be absolutely harmless?

Do Wou Know that 35 average doses of Castoria are furnished for 35 cents, or one cent a dose?

Do Fon Know that when possessed of this perfect preparation, your children may be kept well, and that you may have unbroken rest?

Well, these things are worth knowing. They are facts.

The amount of money realized made the annual ball an unprecedented success.—

"Old Bill" Vosburg Tells the Story of His Crimes.

HAS STOLEN ABOUT \$2,000,000.

Began Stealing at the Age of Thirteen and Has Been a Bank Sneak and All Around Thief For Fifty-six Years-Seven Times

William Vosburg, commonly called "Old Bill," one of the most expert confidence men and bank sneaks in the United States,

men and bank sneaks in the United States, has retired on his laurels after stealing almost \$2,000,000 in the course of 50 years of thioving. As an earnest of his good intentions and as a warning to the rising generation he has given to the New York Journal a confession of his experiences, from which the following is extracted:

The first trick I turned, and how I happened to do it was the funniest thing that ever happened to me. There was a neighbor of ours in Albany by the name of Thompson. One day, when I was 13 years old, he saw me on the way down town, and he asked me if I wouldn't stop in at a tobaccontst's named McPherson and hand him a package he gave me. On my way I him a package he gave me. On my way I found out that it was \$375 in money. As young as I was then I was crazy on gambling. I went down to McPherson's place and started in to give him the search. I went down to McPherson's place and started in to give him the money, but I suddenly thought what a snap it would be if I could use it first to win a little money gambling. You see, I began just

as thousands of boys who have gone wrong. Well, I went into a gambling house in the old Broadway hotel, where everything went in those days, and those darned scoundrels let me play, as young as I was. It didn't take them long to skin me out of all of Thompson's stuff.

well, you can imagine what a young lad like me thought when he got into such a hole as that. I knew I could never get hold of enough money to pay it back without stealing it. I finally thought of a fellow in town panel. low in town named Fleming that I had heard some of the boys say was crooked, and so I hunted him up. I told him what and so I hunted him up. I told him what I had done. To make a long story short, I stole out of the house that night and met Fleming. We went to a grocery store run by an Irishman by the name of Morris. You know in those days they did not have safes, but used to keep their money in their bedrooms at night. It was generally in the shape of bonds. Well, Fleming boosted me up a post that held up the awning in front of the store, and I got in through the window and got into old man Morris' hair trunk and found his roll and natled it. There was \$900 in it. We split the money even. Well, I paid McPherson, and Thompson never did find out that I had lost his money. had lost his money.

From that time I began making a regu

quenched.

The company had a long list of imperative rules. Its members met monthly in the schoolhouse and held an informal hop. The badges were of beautiful, ornate design, picturing a brawny fire laddle carrying a fair young girl down a ladder. A member forfeited a dollar any time he should not respond to the call of duty, this money going toward the expenses of the annual ball, as did other incidental fines.

"You are going to sleep again, Ferdy,"

From that time I began making a regular thing of robbing grocers, and I suppose that in the next two years I had robbed every grocery store in Albany.

The first time I was ever arrested was for doing a fellow what he thought was a great kindness. One of my pals among the young fellows about town got married and I made him a wedding present of a gold watch and \$200 in coin to start house-keeping with. They got on to the watch, and he thought he could save himself by squealing on me. I was pinched, but I had two of the best lawyers in Albany, and they got me off.

Only a few days after that two very

and they got me off.
Only a few days after that two very
slick thieves named Billy McGlinchy and
Ed Hickey came up from New York, and
I fell in with them. We worked two I fell in with them. We worked two
nights together, and I was pretty bold
about it. The result was that I got for
my bit of the two nights' work \$1,000,
and then I left Allers were and then I left Albany.

By this time I was about 16, strong and active, and with no end of nerve. I went straight to New Orleans and began work-ing on the boats. That was sneak work pure and simple. You know there are al-ways two doors to those staterooms on the river boats-an inside and an outside door The work was usually done in the morning. When passengers left their state rooms and went to the washroom to clean up, they would leave their roll, in their vest under the pillow. It was like finding money to have a key that would open the outside door and go in and help yourself. Of course the clerks and stewards would have to stand in

have to stand in.

1 worked the boats for nine years, and I worked the boats for nine years, and was only pinched onco in all that time, but that was not for boat work. It was in Louisville. I fell in there with some "strong arm" men or bank robbers. I only wanted the experience. I got it, and it satisfied me, and I never tried any more "strong arm" work—that is, I never tried to blow up any more safes, although I have robbed hundreds of them since. Well, the mob were all caught, and I got my first conviction. Thieves call that getting "settled."

After I got out I tried the heats again.

After I got out I tried the boats again for awhile, but I couldn't make them go very well. They got on to me too quick, and it meant being shot if you were caught. Then I went up to Buffalo on my way home. There was where I was sottled the second time. It was for working the old time patent bombshell graft. Sometimes we called them patent safes. From Buffalo I came to New York and

From Buffalo I came to New York and have lived here ever since. I worked here for 22 years without being settled. It wasn't because the police didn't want to settle me, but they couldn't nail me, I was so well covered. I didn't stay here all the time, but worked in Philadelphia, Baltimore and Washington. Why, I used to go over to Philadelphia at least 25 out of every 52 Saturdays for years and years. I used to think it a bad day's work if I didn't come back with at least \$1,000. I never turned a trick there but bank work. never turned a trick there but bank work and never got settled there.

The best working pal I ever had, I think, was a fellow named Coleman. We "The good book says it's a place o' rest," replied Tuffold Knutt, squinting contemplatively at the sun.
"It won't be much of a change, will itt" rejoined Mosely Wraggs, after a long pause.—Chicago Tribune.

comparatively safe. Coleman could move quicker and quieter, I believe, than any other man that ever lived. Of course I knew every nook and corner of every bank in New York. I had at one time and an other accounts with every one of them. That kind of work requires big capital. That kind of work requires big capital. For years I was known to every bank on Wall street as a heavy depositor and was never suspected to be a thief. The way we would work a bank would be this: We would do business with a bank until we knew all about it. We knew just where to lay our hands on all the big money. We would know just what kind of "screws" was used on every gate and door. By "screws" I mean keys, of course. We would get acquainted with some of the bank officers. We know just when every man of them went to lunch and how long he was apt to stay. We know, once we got he was apt to stay. We knew, once we got inside the counters, every step we could take without being seen.

I was the "steal," and when we went into steal I would engage the teller in conversation.

conversation. He knew me only as a de-positor and investor. Sometimes I would say my sister had two or three hundred thousand dollars she wanted me to invest thousand dollars she wanted me to invest for her, and that would engage his attention. Sometimes I could' send him into the cashier's office to consult. If he was gone beyond 30 seconds that was often fime enough for Coleman to unlock the gate, slip to the safe, nail the stuff and get out. Of course I would stay and renew the negotiations. Often I would actually invest with them several the property of the safe tually invest with them some of the money Coleman had sneaked. You guess the nerve it takes not to get excited or appear nerve it takes not to get excited or appear as if anything has happened. About the only time I got a little rattled was one day when I was working with "Dutch Heinrich," who was a brother-in-law of John Davis, the green goods man who was killed by a sucker a few years ago. He nailed \$35,000 in one bundle and got away with it. I saw what it was and he didn't have the tenth part of a second to get out and away. I thought they had him nailed sure, and I didn't want to lose all that stuff. But he got away all right.

sure, and I didn't want to lose all that stuff. But he got away all right. One thing we used to depend on was the fact that banks would seldom squeal if they were hit hard for fear of disturbing the confidence of their depositors. That was one reason why it was so much safer to turn big tricks than little ones.

The last few years I haven't worked at anything but green goods business. When I was younger and could see botter, I did "inside" work, but my eyes went back on me and my hands lost their cunning, and so the old man was used as a send—that is, I met the suckers at the depots and steered them against the "office." I used to make about \$100 a day in the green goods business, but I never got home with over \$20 or \$25 of it. It was still a case of fare bank and hot touches. I never could refuse a man who asked a loan. I haven't any idea how much I have leaned thousands much thousands much thousands much thousands. -thousands upon thousands of dollars. Faro banks got at least \$1,000,000 out of
